

Navigation Controllers

The controllers used to navigate through the user interface all implemented The Navigation class so that navigation to certain pages was not repeated.

The flow of events for the user

Network Controller -> Profile Controller -> Relationship Controller ->
NewProfile Controller -> Network Controller

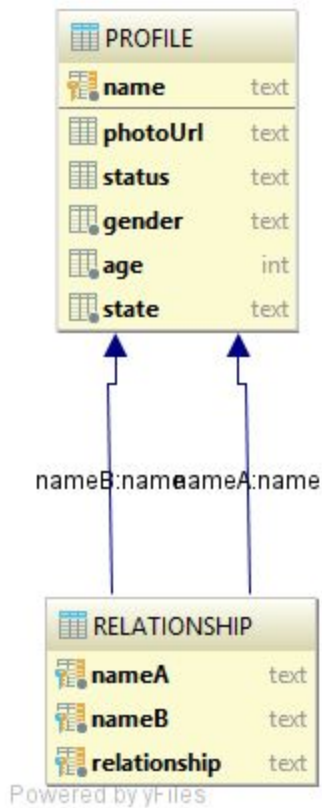

Network Controller -> NewProfile Controller -> Network Controller

Database Diagram

The Database Tables were the following

- Profile
 - Container profiles of users where the name of the user was the primary key
- Relationships
 - Contains the unique relationships between 2 profiles

Enum

The enums were used throughout the application to ensure specific values were consistent

E	State
	ACT
	NSW
	NT
	QLD
	SA
	TAS
	VIC
	WA

E	Relationship
	FRIEND
	COLLEAGUE
	CLASSMATE
	SPOUSE
	PARENT
m	Relationship(String)
p	relationshipType String

E	Gender
	M
	F
	U
